

Pantaleon, Hannah Coleen D.

Taking the Specialized in English 1 class was a good experience. I improved my reading, writing, and critical thinking skills. Another thing that I learned was the pre-reading, reading, and post-reading process. It helped me understand the texts deeply and made the reading easier.

I also learned about the concepts of ethos, pathos, and logos. Ethos is when someone uses their trust to convince us, pathos is when they appeal to our emotions, and logos is when they use facts or logical arguments. It helped me better to analyze the texts and make us believe about their ideas by using different strategies.

The class activities, like analyzing articles and writing essays were also engaging. It gave me a chance to apply what I learned. I enjoyed the process of researching, organizing my thoughts, and presenting them clearly. These activities also helped me improve my communication skills, both written and verbal, as I often had to present my ideas to the class or submit written reflections.

I also worked with my classmates a lot. Even if we are in online class, it gives me an opportunity to collaborate with them. We even shared ideas and learn from each other's perspective. It was good to hear what others thought and reminded me the importance of teamwork.

Overall, Specialized in English 1 help me grow and strengthened my english skills. I learned many new things and made me better at reading, writing, and thinking. feel more confident sharing my ideas and understanding hard topics. This class helped me become a better and smarter person.
